PROFESSIONAL SUMMARY

Logic-driven Physics with Electronics graduate with a focus on Full-Stack Software Engineering. I bridge the gap between analytical engineering principles and creative software development to build secure, scalable systems. Currently architecting robust Fintech and SaaS applications using Python and Django, with a commitment to deep-seated logic, data isolation, and system reliability. Eager to contribute to technical innovation where engineering precision meets digital transformation.

TECHNICAL SKILLS

- **Languages & Backend:** Python (Django, Flask), SQL, RESTful APIs.
- **Frontend & Design:** JavaScript, Tailwind CSS v4, Motion Libraries, HTML5, CSS3, Figma.
- **Engineering & BIM:** Revit, Autodesk Construction Cloud, Visual Studio Code, Git Bash.
- **Core Competencies:** Software Architecture, Database Management, Asynchronous Task Processing, Research & Analysis, Team Leadership, Effective Communication.

SOFTWARE PROJECTS

PayFusion – Fintech SaaS & Payment Infrastructure | Python, Django, Postgres (In Progress)

- **Project Overview:** Architecting a multi-tenant financial platform designed to handle secure e-commerce transactions and QR-code-based payments.
- **Key Features:** Implementing robust data isolation protocols for SaaS architecture and secure authentication logic for financial data handling.
- **Technical Focus:** Prioritizing deep knowledge of software logic over feature implementation to ensure a secure, scalable transaction environment.

URC - Real Estate Listing Platform | Python, Django, MySQL

- **Project Overview:** Engineered a dynamic real estate web application that bridges my background in Building Information Modeling (BIM) with software development.
- **Key Features:** Implemented full CRUD (Create, Read, Update, Delete) functionalities, secure user profiles, and advanced search filtering.

- **Technical Focus:** Utilizing Django to manage complex database relationships and ensure high-integrity data handling for property information.

CineVerse - Movie Discovery Application | Python, HTML, CSS

- **Project Overview:** Designed and developed the backend logic and interface for a database application utilizing high-volume external datasets.
- **Key Features:** Integrated and consumed a Movie API to dynamically fetch, filter, and render detailed movie information and listings to the user.
- **Technical Focus:** Focused on efficient database querying and front-end data presentation, ensuring clean, maintainable code architecture during the development phase.

EDUCATION

APTECH | Maryland, Lagos State, Nigeria || **Full-Stack Web Development with Python Certification** — *Jan. 2026*

- **Focus:** Advanced backend architecture, API integration, and full-cycle web deployment.

Redeemer's University | Ede, Osun State, Nigeria || **B.Sc. Physics with Electronics (Hons)** — *Sept. 2020 – Oct. 2024*

- **Final Project:** Non-destructive Testing of Living Trees (Applied physics principles to solve environmental problems).

WORK EXPERIENCE

Samson Agbato Consulting (SAC) | Lagos, Nigeria NYSC Associate (Asset Valuation & Tech Operations) — *March 2025 – March 2026*

- **Technical Valuation:** Assisted in the inspection and valuation of diverse assets including plant, machinery, and commercial properties, ensuring precise data collection for formal valuation reports.
- **Operational Management:** Supported the facilities management team in monitoring asset performance and maintaining high-integrity records for institutional clients.
- **Process Digitalization:** Leveraged technical documentation skills to assist in the transition of manual property records into digital management systems, improving workflow efficiency.

Department of Works and Maintenance Services (OAU) | Osun State || **Electrical Engineering Intern** — *June 2023 – Nov. 2023*

- **System Maintenance:** Supported the installation and maintenance of campus-wide electrical systems (High-Voltage Power Transformers), ensuring operational efficiency.

- Problem Solving: Diagnosed and repaired electrical faults, adhering strictly to safety standards and engineering protocols.
- Collaboration: Partnered with senior engineers to audit facility compliance, utilizing technical documentation skills.

LEADERSHIP & VOLUNTEERING

Department of Physical Sciences | Head Welfare Director — 2024

- Organized student welfare programs and served as the primary liaison between the student body and university administration.

Department of Physical Sciences | Assistant Academic Officer — 2022

- Coordinated academic support efforts, tutorials, and managed student communications to improve academic performance.

CERTIFICATIONS

- Bachelor of Science (B.Sc.) – Physics with Electronics — 2024
- Full-Stack Web Development with Python — 2026
- Field BIM — Coursera/Autodesk (Feb. 2025)
- BIM Applications for Engineers — (Nov. 2024)
- BIM Fundamentals for Engineers — (Aug. 2024)
- German Language Certification (A1) — (2022)

ADDITIONAL INFORMATION

- Languages: English (Fluent), Yoruba (Fluent), German (Basic A1)
- Interests: Engineering & Design, Technology & Data Science, Content Creation (YouTube).
